The Refund of Water Main Tax in Brightwood Avenue.

The Attorney Advises That When Paid Voluntarily the Assessment Must Stand-Trees in Prospect Place and Thirty-afth Street.

Andrew B. Duvall, the Attorney for the District, yesterday returned to the Comington Lean and Trust Company, with an adverse opinion relative to the request made therein. In behalf of the company, Mr., Moser requested the refund of the amount paid by it on January II, 18st, for an assessment for water main in Erightwood sychule, against Galen E. Green's subdivision, plut II, Girl's Portion.

"The request is based upon the claim."

says the Attorney, "that the assessment has been made illegal by the set of Con-

rerra until water was introduced into the premises.

"The water-main assessment in question was not erroncously paid as is claimed; it was nurposely and voluntarily paid, and I am of the opinion that the application should be denied."

J. F. Fuss, of 614 Thirteenth Street orthwest, recently wrote to the Commissioners asking information relative to the planting of trees on Thirty-fifth Street and Pierpont Place, Oak View. Trueman Lanham, the Superintendent of Parking, after an examination of the losality, has submitted the following state-

"I found a brick sidewalk and cobble-stone gutter, but no curb on the street, and, as all the money for the planting of trees this year will not be sufficient to plant the localities more permanently im-proved, I would recommend that the reproved, I would recommend that the request be not complied with unless the applicant is willing to pay the cost of planting the trees. Nine trees would be needed and the cost would be about £2. I recommend that sugar-maples be used on Pierpont Place."

The above recommendation has been approved by the Engineer Commissioner, and the papers have been forwarded to the Board for final action.

W. E. Spier, contractor for the con building, has submitted a proposal to the Commissioners to plasser the ex-posed walls in the basement instead of whitewashing them. The Inspector of Buildings has returned the proposition to the Commissioners with the statement feet from the bottom show the effects of frost in the joints, and that they need to be pointed up if whitewashed, as otherwise the mortar would probably continue to drop out. In view of this condition of the walls the inspector recommends that the proposition to plaster the walls be accepted without extra cost to the Dis-

rict.
The Inspector of Buildings has also ecommended that the contractor be also wed to use gravel in lieu of crushed tone for mixing the concrete for the file rehes of the granite floors of the build-

The Commissioners yesterday inspected the drainage sewer constructed by the owners of the butterine factory, at Langof the waste from the plant. This exary to the extension of the water main rom Mount Olivet Cemetery to the facory, for the purpose of introducing Poomac water there.
Incidentally to the visit of the Com-

missioners to the factory, they were shown through the plant, and its prinipal operations were explained to them. pon their return to the District Building the Commissioners expressed themselves as well pleased with their tour of
inspection, and it was said that there is
nothing in the way of granting the company their request to have the water
main extended along the Bladensburg
Hoad to their property.

The near completion of the Washington
Aqueduct tunnel and the Howard University reservoir has removed the principal objection to the use of the Potomac
water in large quantity by the factory.

The Commissioners are now understood
to be satisfied that they can extend the
main and serve the factory without detriment to the water supply. ig the Commissioners expressed them-

Dr. A. C. Merriam, of New Jersey Ave. ed the repair of the roadway of Fente cutters on the west side to be repaired. after a consideration of the matter, has after a consideration of the matter, has informed the Commissioners that the minor repairs to the roadway have been made as requested. As to the construction of the gutter, Mr. Hunt mays that it is not necessary, and he does not recommend it unless arrangements are made by the abetting property for the acting of the curb. In that event, he mays, the gutter could be properly constructed. Mr. Hunt recommends that Dr. Merriam be leformed of the above facts, and the Commissioners have approved the same.

Mrs. 5. oddert, of 250 Fourteenth Stree ommissioners to the dangerous coition of the mijoining promises, and has atton of the adjoining previous, and has asked an importion. An investigation made of the fraiter of the complaint by the office of the Inspector of Buildings revealed the fact that a straw bed had been left exposed an Brorof of the premises adjoining those of the complainant, and that there was dauger from fire.

The facts were then brought to the ratios of the Firs Murshal, who caused the straw bed to be removed.

Snowden Ashford, Acting Inspector of doners a schedule of the proposals received for the construction of the addition to the Gura Cottage multiling at the industrial Home School, on the Tenley-town Hond. He states that the lower hid is \$1,39 in excess of the amount again able for the construction. He recom-mends that nil the bids be rejected, and the deposits of the bidders returned to them.

The Commissioners have approved the commendation of A. L. Thomas, of the gineer Department, that the request of lox on the northwest corner of Four-enth and S. Streets northwest, as a shel-r for his fruit stand, be denied. Ma-homas states that the granting of the m-lestion involves the occupancy of puis-sonice for private use, which the Com-issioners have no authority to grant.

Dr. Percy Hickling has recommended that Margette Rogg be appointed gradu-ate nurse at the asplum hospital. Both

"The request is based upon the claim," says the Attorney, "that the assessment has been made likegal by the act of Congress approved June 2, 1900, which provides as follows:

"See. 2. That the Commissioners of the District of Columbia be, and are hereby authorized and directed to cancel the assessment of water-main taxes impaid on Brightwood Avenue for the laying of the water main about July 20, 1891, from Fort Reno teservoir to and on Brightwood Avenue from the Military Road to Aspen Street, where the water had been introduced from said main on adjoining property since said water main was laid, and they are authorized and directed to reassess the tax for laying said main on Brightwood avenue according to existing law."

"The direction contained in said act of Congress related specifically in its terms to the 'unpaid' arsessments on Brightwood Avenue."

"I am of the opinion that said act has no operation upon such water-main taxes as had already been paid. Payment of the unpaid assessments for the Brightwood Avenue water main were merely deferred until water v as introduced into the premises.

"The water-main assessment in question was not crroncously paid as is claimed; it was purposely and voluntarily paid, and tamp time to have cameer or hload ploud is diseased. Buanic Ridood Falm (B. R. B.) will care cancer, blood poleson and all diseases which can be traced back to tained in gill cure cancer, blood poleson and all diseases which can be traced back to tained, impure blood as a foundation. commendations have been approved by ommissioner Ross and forwarded to his sectiates.

The Commissioners have approved the recommendation of A. L. Thomas, an inspector of the Engineer Department, that the application of Howard A. Rhine & Co. be denied. The applicants asked permission to erect a "penny-in-the-slot" ma-chine in front of their premises, Sii E Street northwest. Mr. Thomas stated that the machine was a private enter-prise and that its location as indicated would to some extent interfere with travel.

The Superintendent of Sewers has for-The Superintendent of Sewers has for-warded to the Commissioners a schedule of the proposals received for construct-ing the sewer along the abutment of the Massachusetts Avenue bridge crossing Rock Creek. He recommends awarding the contract to Lyons Bros., the lowest bidders.

Col. W. C. Black, former Engineer Com-missioner of the District, called upon Commissioner Biddle yesterday to pay his respects. Colonel Black spent some time at the District Building, renewing acquaintances and talking over with Ma-jor Biddle some of the old-time affairs of the Engineer Department.

Henry C. Porter, acting as attorney for W. J. Cook, has called the attention of the Commissioners to the water main as-sessment against part of lot 6, block 17, Brookland. He pretests against the payment of the same on the ground that there is no house connection with the main, the owner obtaining water from a well on the premises. The writer auggests the reference of the matter to the Attorney for the District for an opinion upon the point raised.

George Henning, President of the Trad-ers' National Bank, recently wrote to the District Commissioners calling their attention to the power of attorney executed by James K. Murphy to the bank, authorizing it to collect the sum of \$20,388.05 in onnection with the construction of the Tiber Creek intercepting sewer, Mr. Henning requested that since the contract has ben executed and the retents turned over to the Treasurer of the United States, the supers referred to be returned to the bank

for its use.

The Auditor, in reporting upon the matter, takes the view that the papers should be returned as requested. He states that he is informed that the Treasurer of the United States does not receive the assignment of a retent, which the papers in question contempiate, but as they in addition provide for the collection of interest, they should be filed in the office of the Treasurer, and the Auditor recommends that urer, and the Auditor recommends that

TO BE ARRAIGNED FOR FRAUD. Doyle Confesses to Having Victimfzed Luwyers.

Thomas Doyle, who was arrested Tues-day by Precinct Detective O'Dea, will be charged in the Police Court this morning with securing money under false pre-tences. Doyle, who is forty-five years d, is said to have made a confession of 50. is said to have made a confession of the entire affair, admitting that he secur-il the money, and that he had no one to using from West Virginia with a claim gainst a railroad corporation. He comes roin Des Moines, Iowa. from Des Mohes, Iowa.

The delective charges that he secured \$10 from B. F. Leighton, \$20 from another attoriety, and attempted to get an equal amount from A. S. Worthington, who resported the matter to the police,

HALF A MAN.

When a man is sick and can only work half the time he is practically half a man. It requires his whole physical energy to do half a man's work.

In general the weak run down condition which cuts the strength and energy in half is due to dis-ease of the stomach and other organs of digestion and nutrition. You could not expect a half starved man to work more than half the time. The condition of the man with weak stomach is

with weak stomach is that of the half starved man. He is weak through lack of nutrition.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It enables the perfect nutrition of the body and sorestores the strength.

"I had stomach trouble from hirth," writes Mr Willis Seaman, of Washingtonville, Orange Co., N. K., "and suffered with it mare or less as I grew up. At the age of 23 I was broken town with despepsis, My sufference of the strength of the age of 23 I was broken town with despepsis, My sufference or the strength of the age of 23 I was broken town with despepsis, My sufference or the strength of the age of 23 I was broken town with despepsis, My sufference or the strength of the strength stores the strength.
